In the News

Enphase AC Battery sales commence in Australia and New Zealand

'The lithium-ion phosphate battery is expected to be popular for its flexibility', according to ReNew Economy and One Step Off the Grid. 'It is suitable for addition to any existing rooftop solar system, regardless of the brand of inverters or solar panels already in use – as well as for its modularity and ease of installation; each 1.2kWh unit weighs only 25kg and can be wall-mounted indoors, and interconnected with AC wiring.'
